

FLEXTOOL PORTATROWEL® FPT30

The Flextool PortaTrowel's lightweight design improves operator safety and allows for earlier commencement of concrete finishing when compared to heavier walk-behind machines. Matched with multi-use combination blades and a variable-length pole, this unit achieves optimum control from up to 6 metres away and allows the operator to complete finishing works without the need to step foot on the wet concrete.

*Flextool Clip-Together Handles sold separately
