MQ WHITEMAN CHEMICAL SPRAYING SYSTEM WSC55

The MQ Whiteman Chemical Spraying System WSC55 is a superior spraying system designed around mobility and efficiency. The durable cart allows for optimum onsite manoeuvrability whilst carrying up to 200 Litres of material. Featuring a powerful Honda GX160 engine, quick-connect hose fittings and sloped chemical platform, this unit offers various time and cost savings. A small built-in compressor allows the operator to clear and reuse the leftover product in the hose that would normally be discarded, greatly reducing maintenance and waste.

Quick-connect hose fittings
- Provides quick and simple operation
- System includes a spray gun and 15 metre hose

Work tray
Holds tools and other onsite needs

Honda GX160 engine
With gear reduction to provide reliable operation

Heavy-duty pump
Suitable for pumping materials containing up to 25% solids

Sloped platform
- Allows material to be easily dispensed
- Holds one large (200L) container or up to four small (20L) containers

Forklift pockets
For easy and safe transport and onsite handling

Smooth tyres
Reduces risk of floor damage

Parking brake
Secures unit on uneven ground

Engine-driven compressor
- Recycles leftover product remaining in the system
- Reduces wastage
- Cleans lines

POWERED by HONDA
